

Instagram Grid Planner

for Notion

Thank you for your purchase!

You now have access to the Instagram Grid Planner - a visual tool that helps you plan your Instagram feed directly inside Notion.

Step 1: Get Your Notion Template

Click the link below to open the Notion template, then click 'Duplicate' in the top-right corner to add it to your workspace:

<https://www.notion.so/a59ef0a1665b4134a973a4a0bbf285c4>

Step 2: Add Your Posts

In your duplicated database, add your Instagram posts with:

- **Image** - Upload or paste image URL
- **Caption** - Your post caption
- **Status** - Idea, Draft, Ready, Scheduled, or Live
- **Publish Date** - When you plan to post
- **Slot** - Position in grid (1-9)

Step 3: Embed the Widget

In any Notion page, type /embed and paste this widget URL:

<https://social-grid-widget.vercel.app/widget>

Step 4: Plan Your Grid

Use the widget to:

- **Preview** how your feed will look
 - **Drag posts** to rearrange the order
 - **Export** your grid as a PNG image
 - **Refresh** to sync changes from Notion
-

Tips

- Toggle badges on/off using the tag icon
- Switch between Grid and Phone preview modes
- Click any post to see full details
